PROJECTS

Portfolio Website
- My portfolio website that I've made using ReactJS, comes with darkmode functionality.
- Tech used : ReactJS
- **Website link**

eMart
- eMart comes up with all the functionality that any eCommerce should be having like Amazon and Flipkart.
- Login functionality using Google, GitHub and Facebook which is done by using Auth0.
- Your profile picture and name will be displayed after the login.
- Contact page and mailing using Formspree.
- Your name and mail will automatically be fetched in contact page.
- Entire products data is coming dynamically from the API using axios.
- One can filter all the products various kind of category wise.
- Tech used : ReactJS & Styled Components
- **Website link**

Stack Overflow Clone
- It's having all the basic to advanced feachers that Stack Overflow is having.
- In addition to that I have also implemented chatbot to it.
- JWT based user authentication and login system.
- There will be an avatar of your first name after login into the website.
- As far as your security is concerned, you will automatically be logged out if you have not visited the website for an one hour.
- Only same user will be able to delete Q&A and edit profile otherwise option will not be there.
- User can also upvotes and downvotes the questions.
- Tech used : MongoDB, ExpressJS, ReactJS, NodeJS, Redux & Redux Thunk
- **Website link**

Weather App
- A web application which I've made using real time weather API and it shows weather of whichever city you want.
- Tech used : ReactJS
- **Website link**

Full Stack CRUD App
- Full Stack CRUD App is basically a web app named QuickNote where you can create, read, update and delete your notes quickly.
- Firebase is being used for login/logout and storing the information of the user.
- Font Awesome and Tailwind CSS are used for eye catchy styles and animations.
- Tech used : NextJS, Firebase & Tailwind CSS
- **Website link**

SKILLS

C   C++   Python   HTML   CSS

JavaScript   Bootstrap   Tailwind CSS
